EDUCATION

Dharmsinh Desai University (DDU)

Bachelor of Technology in Computer Engineering

- Overall CGPA : **7.87**
- HighSchool : Royal Science School, Dhoraji
- 12th Borad Results : 95.48PR overall, 95.06PR Science
- 10th Borad Results : 99.03PR

TECHNICAL SKILLS

- **Programming Languages** : C/C++, Java, JavaScript, TypeScript, Python, C#, Dart
- **Web Technologies** : HTML, CSS, JS, Node.js, PHP, Django, bootstrap, Express, React, Flutter
- **Databases** : MySQL, Oracle, MongoDB, Firebase

PROJECTS

GREENCART - (100% Organic Product Selling)

Technologies: Node.js, React.js, MongoDB

- Developed *GreenCart*, an intuitive e-commerce platform for 100% organic products with secure login, real-time order tracking, and seamless Razorpay payment integration.
- Implemented a responsive and user-friendly interface for smooth browsing and purchasing experience across all devices.
- Built a robust backend to enable efficient product management, order processing, and analytics for admin-level insights and control.

ARTSPIRE - (Auction Based Art Selling):

Technologies: Django, Python, HTML, CSS, JavaScript

- Designed and developed an auction-based platform for selling artwork, where artists can list their pieces and users can place bids in real-time.
- Integrated Django's powerful backend framework to handle user authentication, bidding systems, and dynamic content rendering.
- Created intuitive user interfaces with HTML, CSS, and JavaScript for seamless interaction between artists, buyers, and the bidding process.

HERITAGEHUB - (Indian Heritage Site):

Technologies: ASP .NET Framework , C#, SSMS Server

- Developed a web application showcasing Indian heritage sites with CRUD operations, allowing admins to manage heritage data (add, update, delete).
- Implemented user roles where admins can upload heritage images, manage content, and users can view, like, and comment on heritage images.
- Utilized ASP .NET Web Forms for building dynamic pages, incorporating backend logic using C# and managing data with SSMS Server.
- Focused on creating a smooth user experience with basic operations, ensuring reliable performance and data integrity.

DOCSCHEDULER - (Doctor Appointment Sysytem)

Technologies: Flutter, Dart, Firebase

- Built a cross-platform mobile app using Flutter for patients to schedule and manage doctor appointments seamlessly.
- Implemented intuitive user interfaces with Flutter's widgets, allowing users to browse doctors by specialty, view availability, and book appointments.
- Integrated Firebase for user authentication, real-time database management, and secure storage of appointment data.
- Designed and developed features such as notifications for upcoming appointments, doctor profiles, and appointment history for improved patient-doctor interaction.
- Focused on delivering a smooth and responsive experience across different devices with efficient state management using Dart.
